

I Gusti Bagus Anggas Putra Maheswara

Bekasi, ID | (+62) 857-1010-4498 | anggasspm@gmail.com | [LinkedIn](#) | [Github](#)

EDUCATION

Universitas Pembangunan Nasional "Veteran" Jakarta

Bachelor's Degree of Computer Science, Informatics

Cumulative GPA : 3.92 / 4.00

Jakarta, Indonesia

2024 – 2028 (Expected)

EXPERIENCES

Sportavest UPNVJ 2025 | Equipment & Logistics Staff

Oct 2024 – Nov 2024

UPN Veteran Jakarta's largest annual sports & esports festival, spanning 7 faculties

- Managed procurement, inventory, and distribution of equipment across **5 sports branches** (badminton, basketball, volleyball, futsal, esports) throughout the **14-day event**.
- Coordinated with venue PICs across overlapping match schedules to ensure on-time equipment readiness, minimizing setup delays during peak competition days.

KSM MULTIMEDIA UPN Veteran Jakarta | UI/UX Designer

Mar 2025 – Nov 2025

- Conducted **user research** and designed **wireframes and interactive prototypes** using Figma for digital product development projects.
- Collaborated with multidisciplinary teams to create **user-centered interface designs** and improve overall usability.

PROJECTS

Lost & Found Platform | Full-Stack Developer | [Project Link](#)

Mar 2025

React.js, Node.js, PostgreSQL, Prisma, Socket.IO, Leaflet

- Developed a **full-stack lost-and-found platform** with **JWT authentication**, image uploads, and interactive map-based item tracking to help users report and locate lost belongings.
- Built **real-time messaging** using Socket.IO and developed **RESTful APIs** with Express.js, Prisma, and PostgreSQL to manage users, items, and chat communications.

Mary Forensic Platform | Frontend Developer (Team Project) | [Project Link](#)

Apr 2026 – Jun 2026

React.js, Tailwind CSS, Axios, Vite

- Built the frontend for an AI-powered deepfake detection platform, including upload, multi-layer analysis display (NPR signal, metadata anomaly, VLLM), and **chain-of-custody audit trail** UI for digital evidence.
- Built a report flow UI that lets users **download PDF forensic reports** and auto-fills incident narratives for official submission to Patroli Siber and Dumas Presisi Polri.

GitBrief | Full-Stack Developer | [Project Link](#)

Jun 2026

Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Vercel AI SDK

- Built an AI-powered web app that turns any GitHub repo, commit, or pull request into a structured plain-English explanation with **risk scoring** and automatic **breaking-change detection**.
- Engineered a **multi-model AI fallback pipeline** (Gemini, Groq, OpenRouter) using Vercel AI SDK's structured output to ensure reliability when a provider fails or hits rate limits.
- Integrated the **GitHub REST API** to fetch commits, PRs, and diffs, and built a custom diff viewer that renders line-by-line additions and deletions per file.

SKILLS

Languages : HTML/CSS, Java, Typescript/Javascript

Frameworks : React.js, React Native, Next.js, FastAPI, Express.js, Tailwind CSS, Node.js

Database/ORM : SQL (MySQL, PostgreSQL, SQLite), NoSQL (MongoDB, Neo4j, Qdrant), Prisma, Supabase, Firebase

Tools : Figma, Git, GitHub, Notion, Postman, Vercel, Google Cloud, Microsoft Office 365, Maze

Soft Skills : Communication, Problem Solving, Team Collaboration, Adaptability, Project Management, Creativity, Attention to Detail
